

NO-WIRE BRA: COMFORTABLE AND WELL-FITTING.

With its soft-touch feeling, it is ideal for smaller-busted and sport-playing women.
Soft and Triangolo: the no-wire bras.

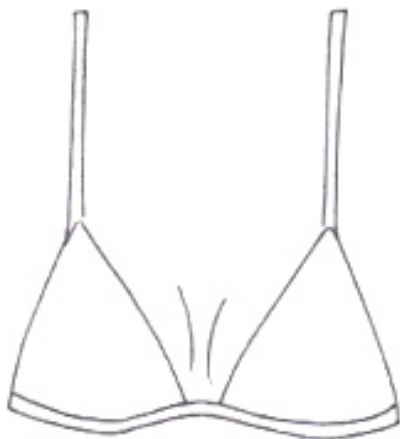

SOFT

It is a wireless bra with a very soft structure, studied to support breasts softly and smoothly; it is quite naturally shaped and cups are generally made from fabric only (no padding inside). Extremely comfortable and versatile, it fits women who cannot stand underwire but do not give up a good support.

ADVICE: the soft bra is ideal for participating in low-impact sports, such as pilates or yoga; choose the smooth model in this case, made from cotton jersey or microfiber.

TRIANGOLO

The name refers to the typical triangular cup-shape, with or without padding. Not too much supportive for larger busts unfortunately, it is ideal for young or smaller-busted women.

ADVICE: it is a funny bra, for sports-fans; wear it under V-tops and T-shirts in summertime.
